

1 Adult Beginner Chord Chart (Naturals Only)

Remember:

- If no chord type is specified then it's a major chord, e.g. C = Cmaj
- A lower case m after the chord means minor
- X5 is also called a power chord

 C	 Cm	 A	 Am
 D	 Dm	 B	 Bm
 E	 Em		
 F	 Fm	 E5	 A5
 G	 Gm	 F5	 B5

The power chords without any open strings ringing (**F5** and **B5** here) can be moved up and down the neck to play any power chord! Power chords are neither major nor minor. They're used a lot in punk.
